

WMK

Wheel Hook

- **Universal applicability:** The sophisticated design allows for use with a wide variety of rim types.
- **Reduced rework:** Minimal contact points at the valve hole significantly reduce imperfections during coating.
- **Easy Handling:** The fixture can be secured either with a standard M8 screw or with our optional threaded bolt and cap, which simplifies the process.
- **Increased efficiency:** Saves time and effort, while increasing the precision and quality of your work.

Partnumber	Description	Dimension	Bag Qty
